

IN-LINE ROLLER-SKATE, PARTICULARLY FOR RACING

ABSTRACT

5 An in-line roller-skate for racing includes footwear (102) and a chassis (104) supporting a train of wheels (108). The footwear (102) is provided on the bottom with a sole (103), which is in turn provided with at least a first and a second binding point (105, 111) for attachment to the chassis (104).
10 The first binding point (105) is positioned in the heel-piece zone of the sole (103), whereas the second binding point (111) is positioned in proximity of the foot toe, approximately in the area in which the juncture of the toes lies. The train of wheels (108) has solely wheels (108) having a diameter of 100 mm, while the chassis (104) is adapted to accommodate fasteners in its interior (107) for joining the footwear (102) to the chassis (104).
